EXPEDITED PROCEDURE
EXAMINING GROUP _QQQ1

Sir:

Responsive to the Office Action dated July 19, 2007, the Applicants respectfully request reconsideration and reexamination of the application in view of the following remarks.

Claims 1-3, 5-7, and 9-16 were rejected under 35 U.S.C. § 102(e) as being anticipated by Kashiwagi et al. (US 6,393,574). This rejection is respectfully traversed and is believed clearly inapplicable to claims 1-3, 5-7, and 9-16 for the following reasons.

Independent claim 1 recites a recording apparatus for recording a compressed stream onto a recording medium, wherein the compressed stream is generated by encoding a broadcast signal. The recording apparatus includes, in part, a system controller and an encoder operable to generate the compressed stream (from the received broadcast signal), wherein the compressed stream includes a main unit. Claim 1 recites that the main unit is (1) <u>formed from sub-units</u> obtained from dividing the compressed stream into sub-units, and is (2) <u>formed according to an instruction</u>. Further, claim 1 recites that (3) <u>the instruction is an instruction to form the main unit</u> based on a monitored data size of the sub-units and the instruction is provided from the system controller (4) <u>when the data size of the sub-units exceeds a predetermined threshold</u>. Finally, claim 1
